# QUEST KASPA

## The First Quest on the Kaspa Network (and other Networks)

This innovative project is designed for the smartest and most daring among you. Do you want to make money? Do you love challenges, puzzles, riddles, and treasure hunts? Then take your chance and join the adventure!

# ABOUT

We've created a token for incredible treasure hunts... Embark on an adventure to solve the most challenging riddles and try your luck at winning 40M tokens across 10 different seasons (40% of the supply).

Navigate through the map of the current season on our website, where you'll find 12 riddles corresponding to the 12 words of a seed phrase. Once you've solved all 12 riddles and obtained the 12 words, you'll need to burn 10,000 QUEST tokens. After that, you can complete the online form by submitting the 12 words, the burn transaction hash (proof of transaction), and an email address. We'll send you the correct word order so you can unlock your treasure.

Since the difficulty level is high, we will provide evolving clues every day. This game is also a race against time—the first person to arrange the 12 words correctly will win the treasure. So hurry up and make sure you have enough QUEST tokens before the price goes too high! The game will end in a maximum of 10 weeks, and one lucky winner will claim the jackpot!

# Game Rules V1

We have created 12 riddles corresponding to the 12 words of a seed phrase. The first version of the game is relatively simple: you need to solve the riddles to obtain the 12 words, then burn **10,000 QUEST tokens**.

Afterward, you will find a form on our website to fill out, and we will reveal the correct order of the words so you can claim the treasure. Once this season is complete, you will need to wait for the next season to begin.

# Game Rules V2

Connect your Kasware wallet to our website to start the game. You will need a minimum of 10,120 QUEST tokens in your wallet (10,000 will be burned at the end of the game, and 10 QUEST tokens will be burned per attempt to guess a word). We recommend having more tokens to make multiple attempts in case of incorrect answers.

Navigate through the map on our website, where you'll find 12 zones to visit one after another. Each zone (or level) corresponds to one or more riddles. Once you solve a riddle, you'll receive one word of the seed phrase. If you're confident in your answer, enter the word in the provided field and click "validate." At that moment, 1 QUEST token from your wallet will be sent to the burn address.

- If your answer is correct, the next level will unlock.
- If your answer is wrong, you'll remain stuck on the current level and need to burn another token to submit a new attempt.

If you solve all the riddles, you'll reach the end of the game, but it's not over yet. You'll still need the correct order of the words to complete the seed phrase. To obtain the order, you'll need to burn 10,000 QUEST tokens at the end of the game, and the order will appear as a final riddle.

This game is also a race against time! The first player to find the 12 words in the correct order will win the treasure (4M QUEST tokens). So hurry up and make sure you have enough QUEST tokens to make multiple attempts before the price becomes too high!

In approximately 10 weeks, the game will end, and one winner will claim the jackpot!

# QUEST TOKEN

The Quest token has a critical utility because, without it, you cannot win the jackpot. If you solve the 12 riddles, you will need to fill out the online form on our website and burn 10,000 QUEST tokens at the provided burn address. Once we receive proof of the burn, we will send you the correct order of the words in the form of a final clue to access the seed.

If you couldn't mint the token at the beginning, we recommend buying it quickly before the price increases. With the treasure pools locked and tokens being burned, owning 10,000 QUEST could become very expensive in just a few days.

What will happen to the token once the game is over? Make sure to hold onto your QUEST tokens because they will be essential for all future seasons! Think carefully before selling them.

# TOKENOMICS

TICKER : QUEST

MAX SUPPLY : 100 000 000

MINT : 50 000 000

PREMINT FOR POOL TREASURES 40 000 000

LIQUIDITY FOR EXCHANGES AND TEAM DEV 10 000 000

The 40% of Quest from the premine is locked on 10 addresses and will return to the community as game treasures

# TREASURE

The treasure for this quest consists of 4M tokens from the premine stored in a wallet. Only the founder of the game holds the private key. Once the winner retrieves the complete seed phrase, we recommend transferring the entire token amount to their personal wallet to secure the treasure.

## Why will the value of the treasure increase during the game?

The token has real utility—it is essential to progress in the game. The burns at the end of the game (and during the game starting from the website's V2) will help drive up the token's price. Player demand for QUEST tokens will be significant, causing its value to rise.

Here's an example of the treasure's value based on the market cap:

- Initial Market Cap (\$123,000): Treasure value = \$4,920
- Market Cap \$500k: Treasure value = \$20,000
- Market Cap \$1M: Treasure value = \$40,000
- Market Cap \$5M: Treasure value = \$200,000
- Market Cap \$10M: Treasure value = \$400,000

# ROADMAP

Phase 1

December 2024: Project creation

Phase 2

January 2025: Token deployment and start of the game, listing on CHAINGE with liquidity contribution

Phase 3

End of March 2025: Season 2 of Quest with ???, another listing exchanges

Phase 4

May 2025: Season 3 of Quest with ???

Phase 5

June 2025: Website V2 with Kasware wallet integration, interactive map and partnership with other KRC20, another exchange, coingecko listing
